

## Equipson's New Dedicated Website For WORK® Lifters

**MANUFACTURER:** Equipson S.A. has a new website exclusively dedicated to its range of WORK® lifting towers. The site provides the most complete information about its lifting towers WORK and is divided in three main sections: Towers for events, Towers for installations, and Accessories. Each model has its own page and the visitor can easily compare features of the different towers, thanks to the comparative product table. All the pictures, user manuals and certificates can also be downloaded directly from the website. Another advantage is that visitors can get a quote directly from the Website for the lifting towers they are interested in. Visit the new site at [www.worklifters.com](http://www.worklifters.com)
